# Machine Learning para Inteligencia Artificial

Distribución como generador

Universidad ORT Uruguay

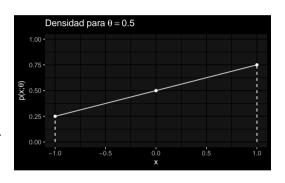

26 de Marzo, 2025

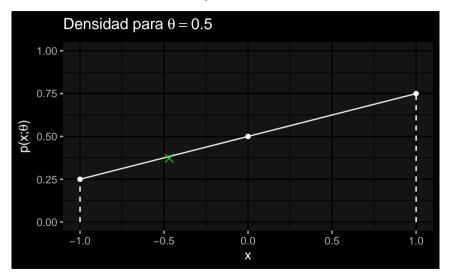

#### Distribución = Generador

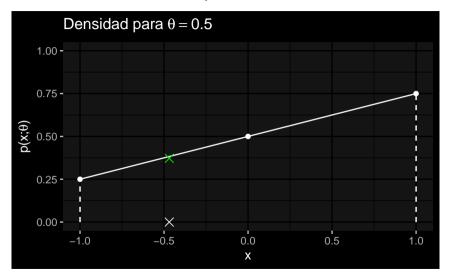

Consideremos la densidad

$$p(x;\theta) = \frac{1}{2}(1+\theta x) - 1 \le x \le 1$$

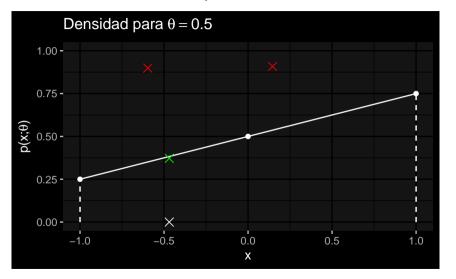

Parámetro  $\theta$  también varía entre -1 y 1.

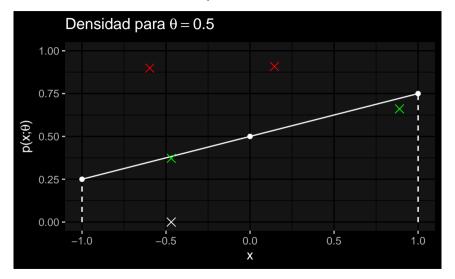

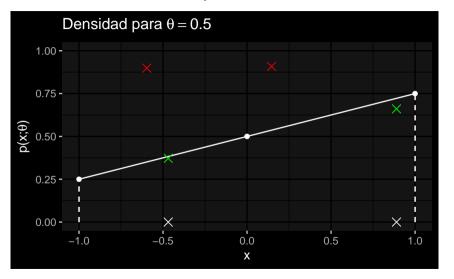

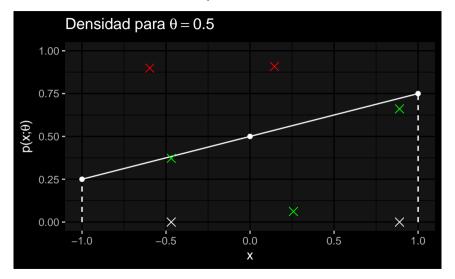

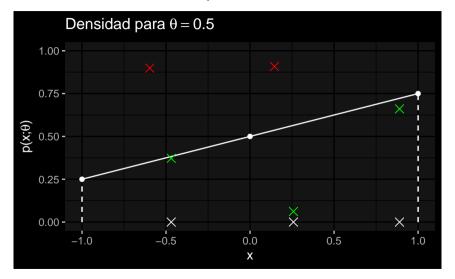

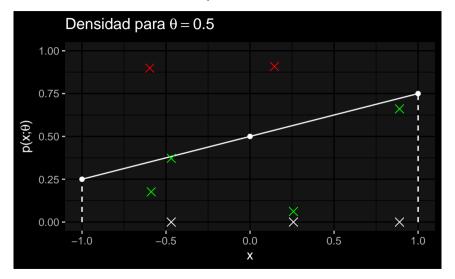

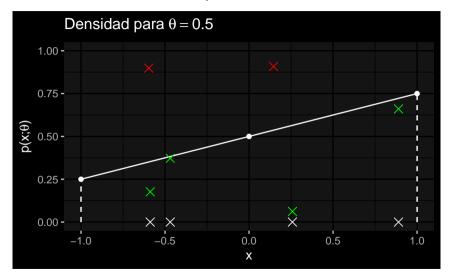

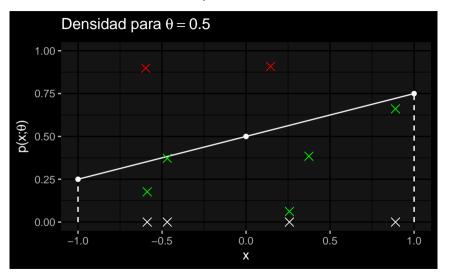

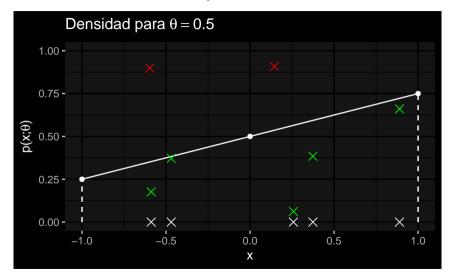

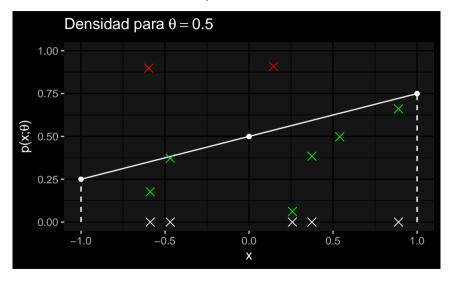

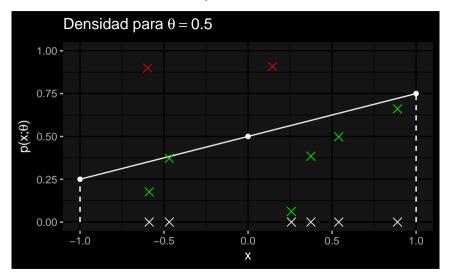

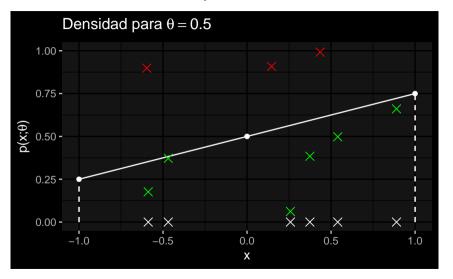

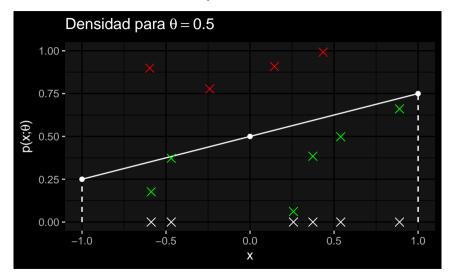

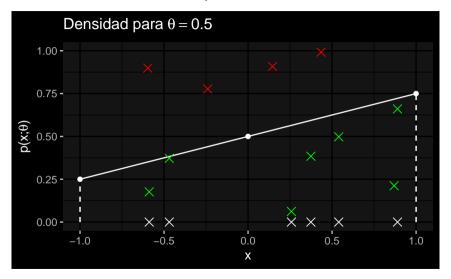

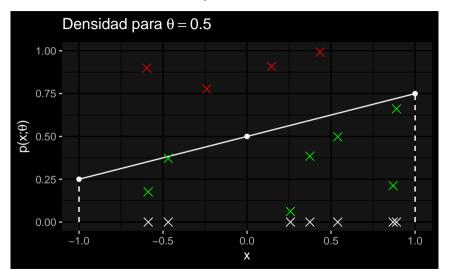

#### Resultado

El resultado de nuestra simulación es

-0.47 0.89 0.26 -0.59 0.37 0.54 0.87
